# SQUIGGLE™

Squiggle is a 41-piece tile game where the object is to play all 10 of your tiles by connecting them to previously played tiles on the board.

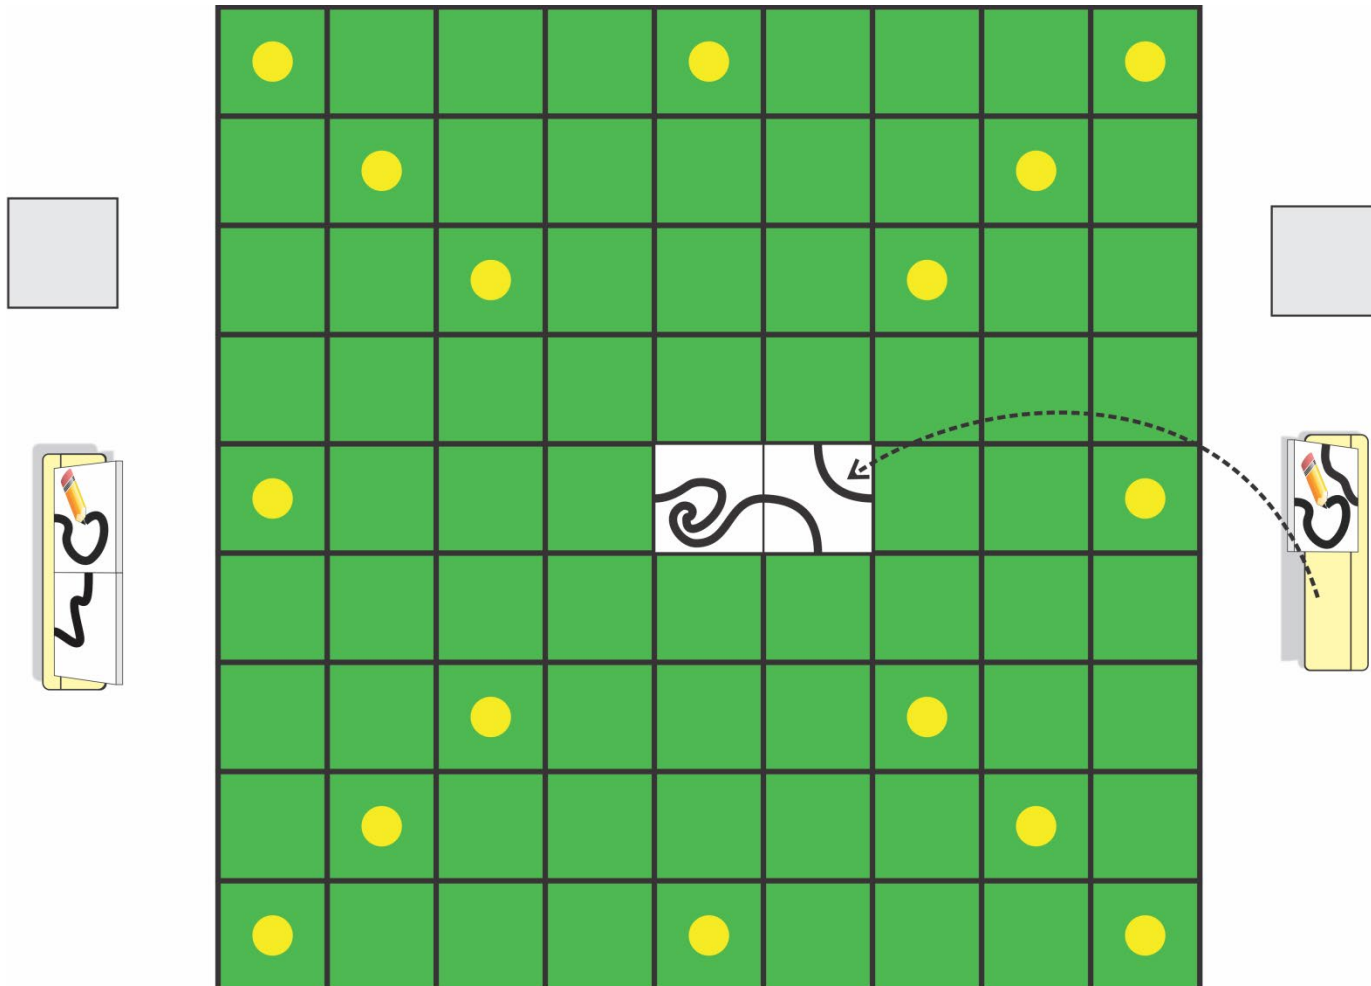

# SQUIGGLE™

To start the game, place the game board down, and give each player 10 tiles and a tile holder. Take 2 tiles and place them on the tile holder. Randomly select and place one tile in the center of the board.

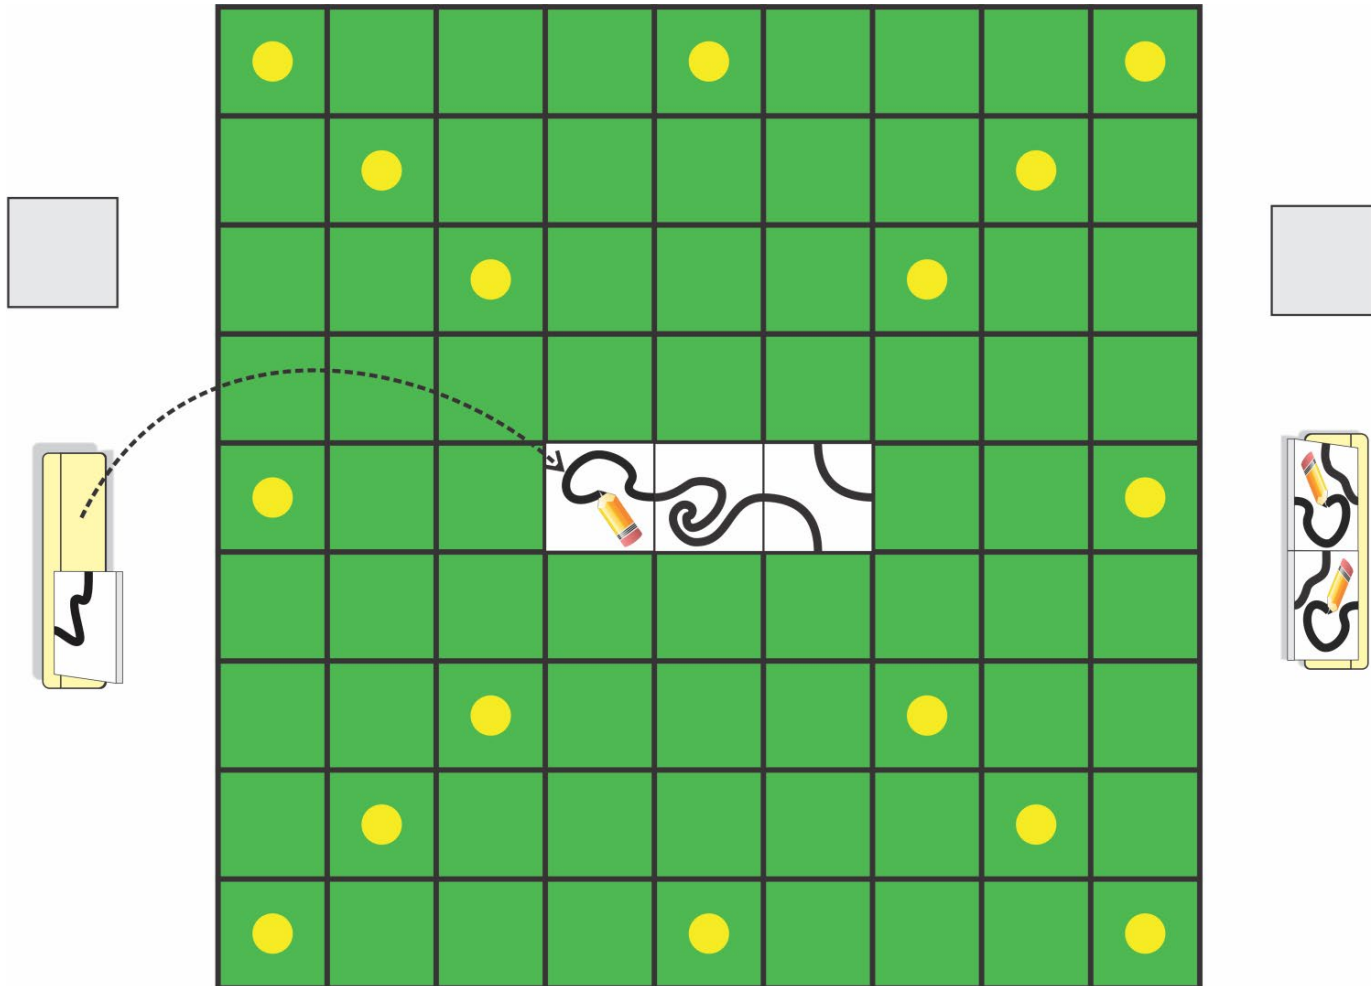

# SQUIGGLE™

You start the game by choosing one of your two tiles and playing it onto the board so as to connect to a previously played tile. You draw a replacement tile.

# SQUIGGLE™

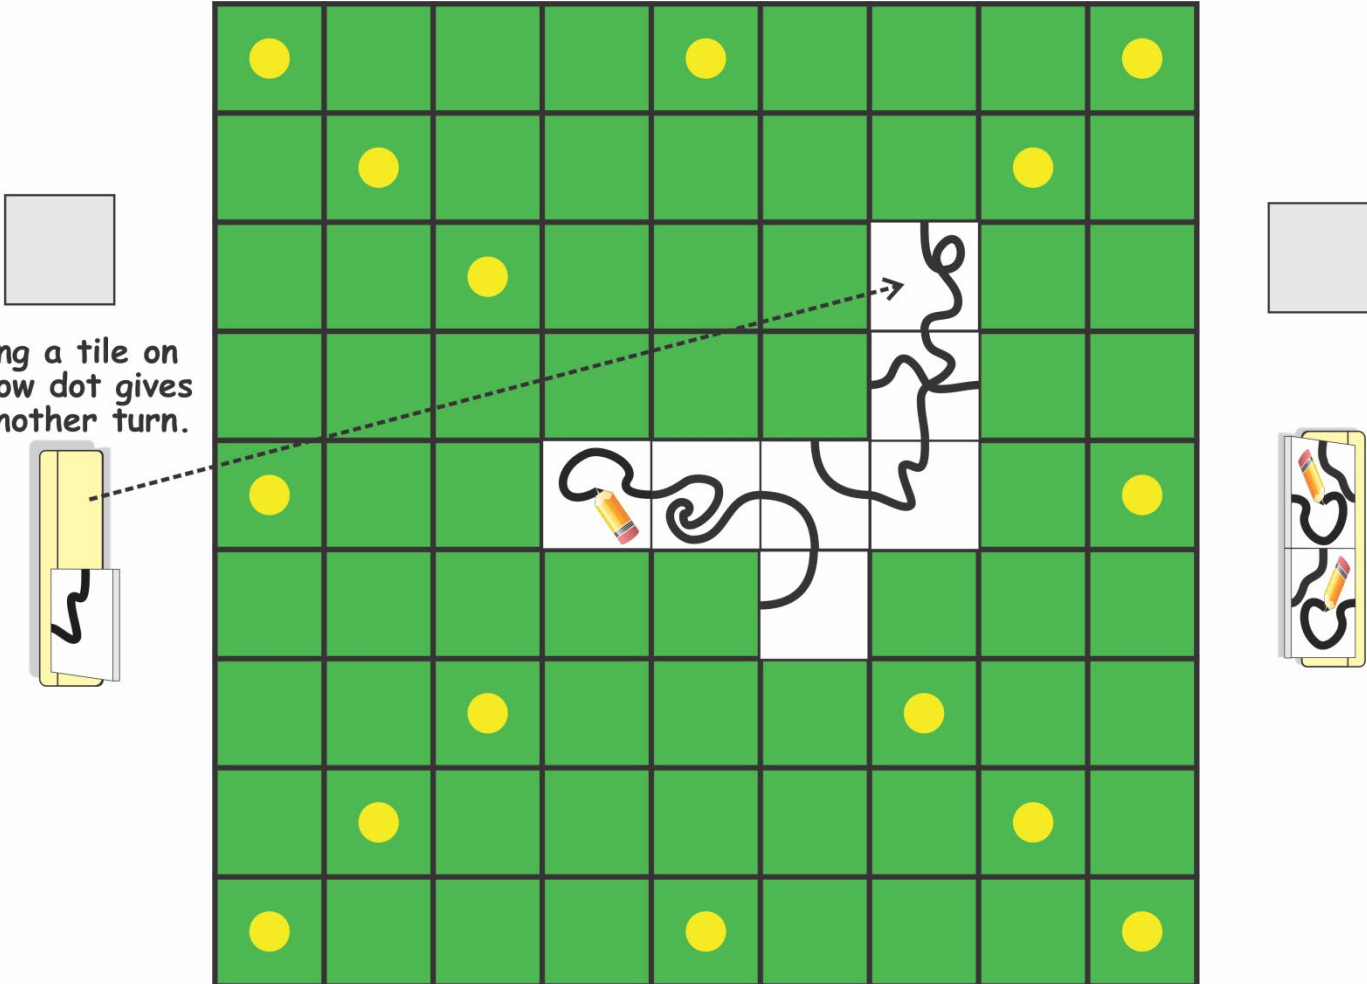

The next player places a tile. Play continues in this way throughout the game.

# SQUIGGLE™

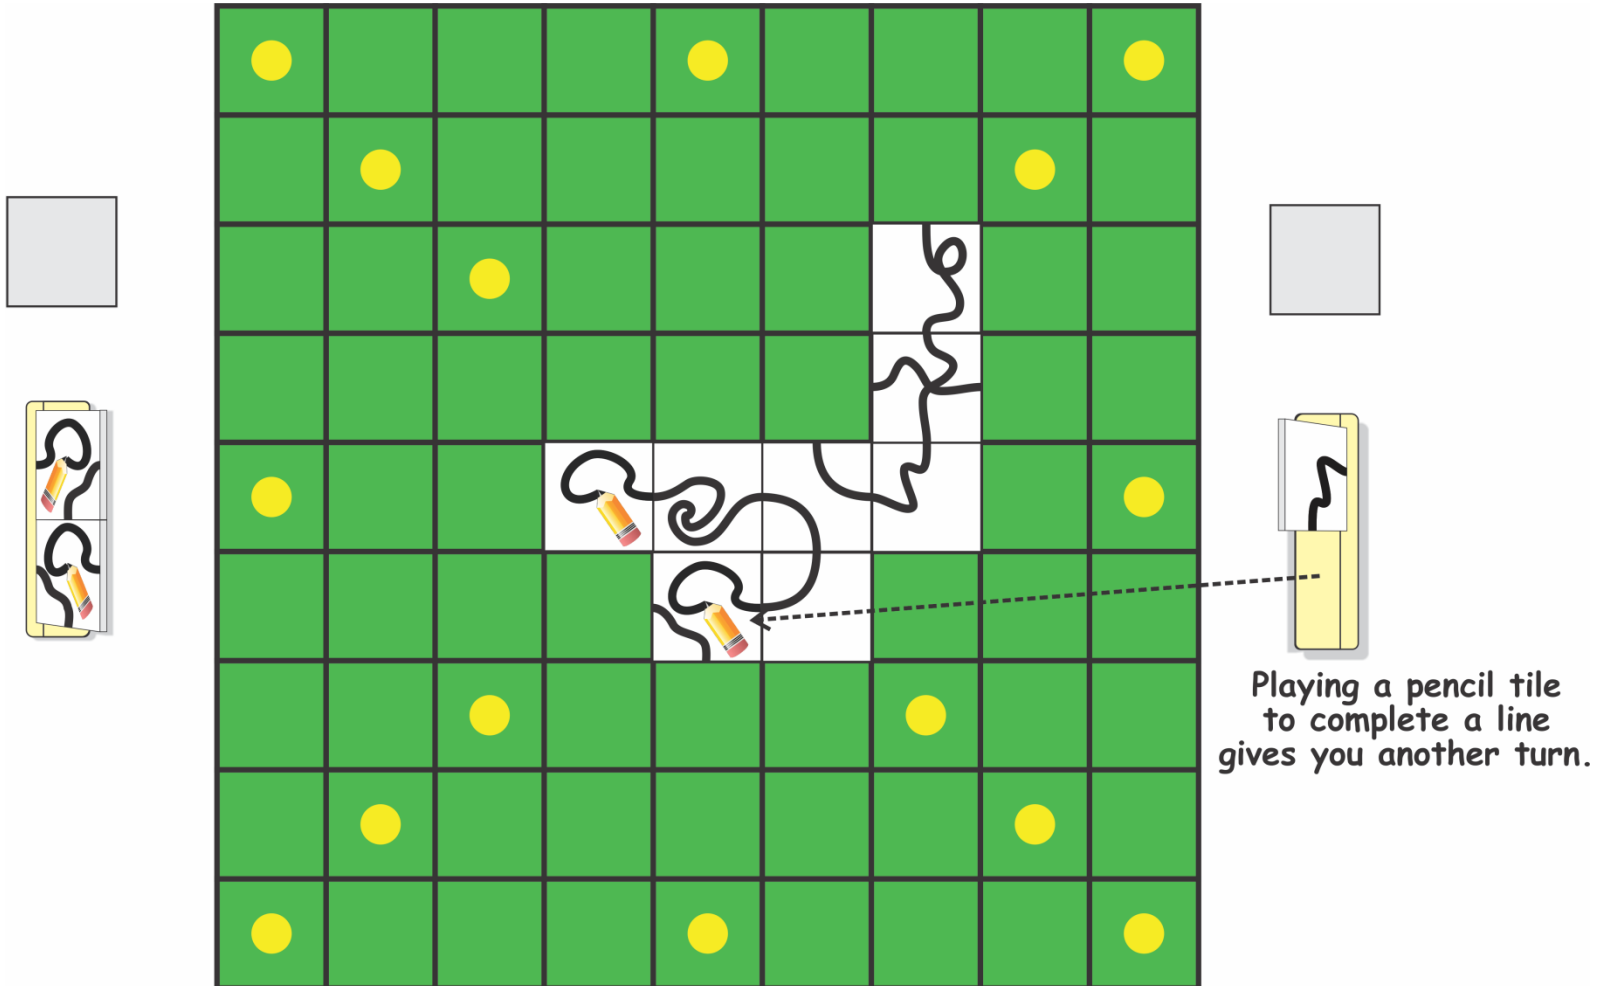

You are able to play more than one tile on your turn if you place a tile on any of the yellow dots on the board.

Playing a tile on a yellow dot gives you another turn.

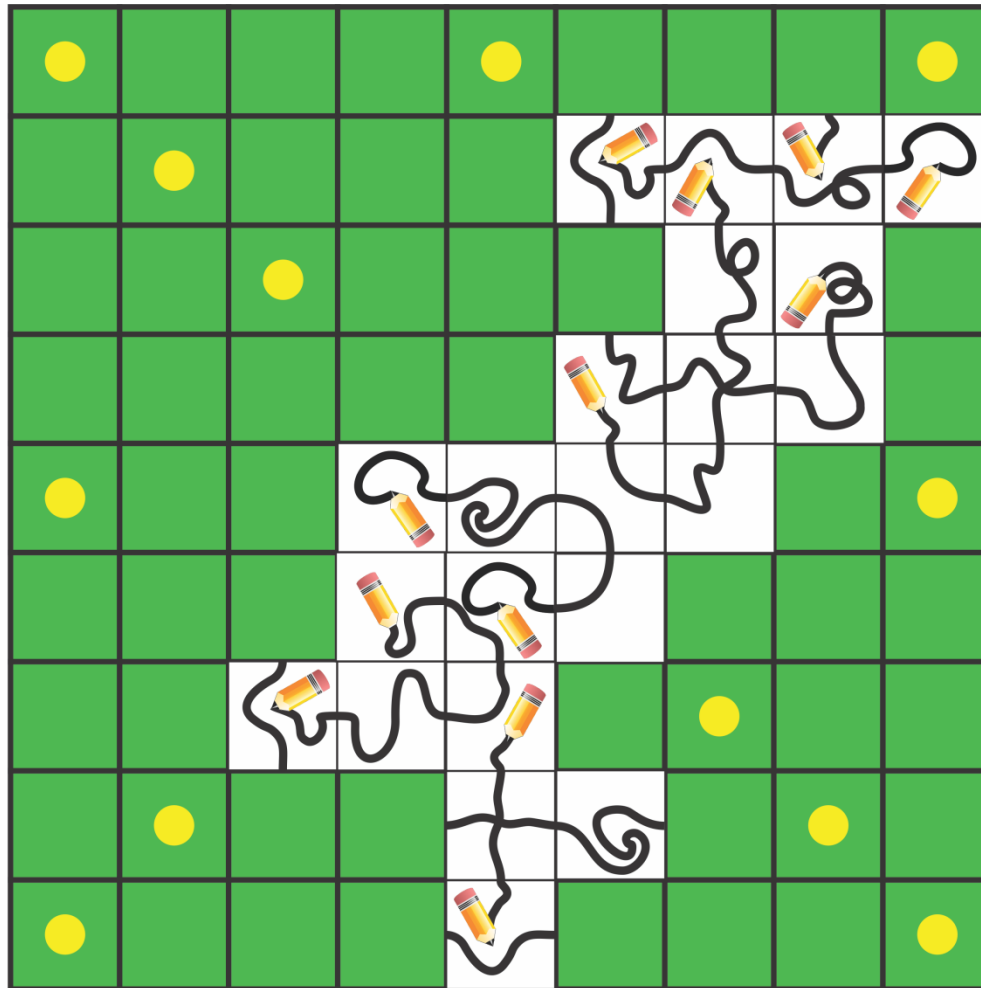

# SQUIGGLE™

You also get another turn to play a tile if you play a pencil tile on a line that has another pencil at the opposite end and thereby complete that line.

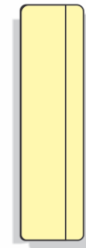

# SQUIGGLE™

Play continues until one player has played all 10 tiles. That player is the winner!

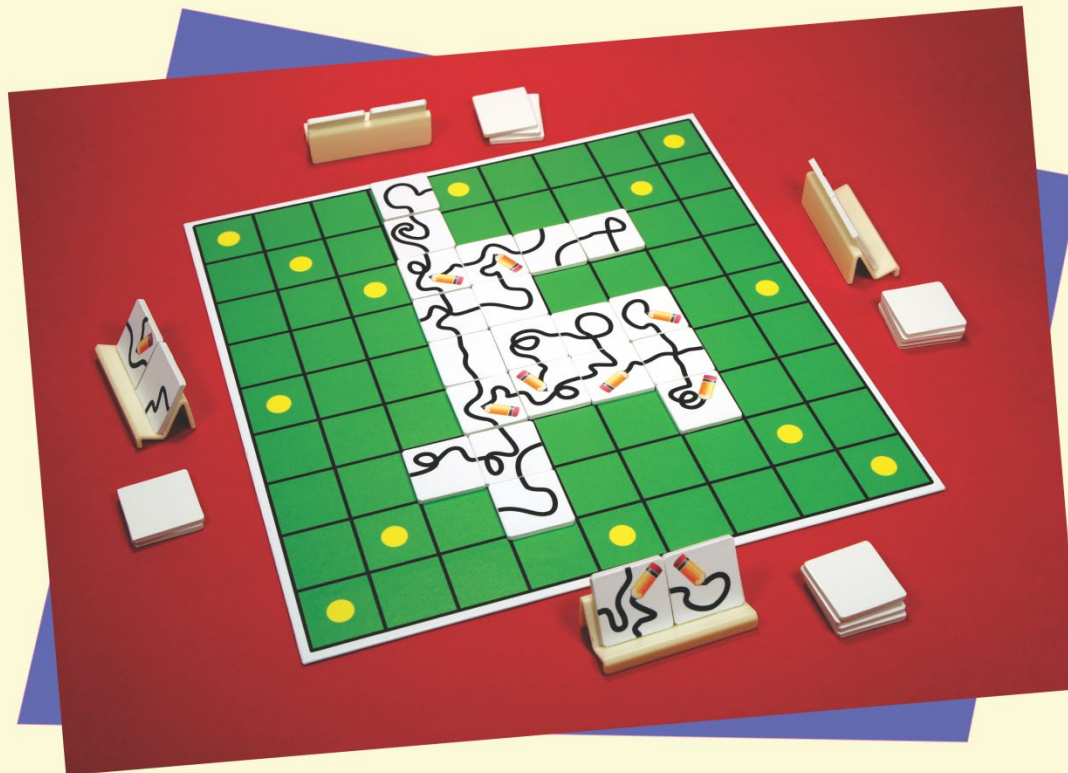

Winner!
